THE AMERICAN MERCURY

A Tale of Terror in the Black Country

COLD HARBOUR

By FRANCIS BRETT YOUNG Author of "Sea Horses"

"As Ronald Wake and his wife tell by turns of their mystifying and nerveshattering experiences in the house of Humphrey Furnival in the Black Country of Wales there arises gradually the mood of monstrous evil and sinister forces which the author has sought for with a sure hand. Visible malice, invisible horrors and gooseflesh are all in 'Cold Harbour.' It is a technical tour de force and what is more, a good story."—The New York Herald-Tribune.

modern history at the Scotch university of St. Andrew's. There is a bibliography appended to each chapter.

THE STORY OF TEXTILES.

By Perry Walton.

The Walton Advertising and Printing Company 934 x 614; 274 pp. Boston

A brief history of the manufacture of textiles, from the earliest known times down to the present. There are many drawings, and the book is well written.

RELEASED FOR PUBLICATION.

By Oscar King Davis. The Houghton Mifflin Company \$5 9 x 534; 468 pp. Boston

The reminiscences of a former Washington correspondent, chiefly devoted to the late Col. Roosevelt.

THE SCIENCES

THE SOCIAL THEORY OF GEORG SIMMEL.

By Nicholas J. Spykman. The University of Chicago Press \$3 8½ x 5½; 297 pp. Chicago

A critical study of the work of one of the fathers of sociology. Simmel was born in 1858 and died in 1918. He lectured at Berlin until 1914, when he moved to Strassburg, where the chaos of the war soon destroyed his work and hastened his death. Dr. Spykman's account of him is painstaking and thorough, but almost unimaginably dull. There is an elaborate bibliography.

THE MORPHOLOGY AND THE EVOLUTION OF THE APES AND MAN.

By Charles F. Sonntag. John Bale, Sons & Danielsson 12 s., 6 d. 81/4 x 51/4; 364 pp. London

The first comprehensive work on the comparative anatomy of the primates. The author, who is prosector to the Zoölogical Society of London, has had immense experience in the dissecting-room, and so his report is authoritative and full of novelty. The close physical relationship between man and the other primates is overwhelmingly established.

MENTAL AND PHYSICAL TRAITS OF A THOUSAND GIFTED CHILDREN.

By Lewis M. Terman and others.

The Stanford University Press \$5 8½ x 5½; 638 pp. Palo Alto, Calif.

This massive study was made in the California public schools, by Dr. Terman and fourteen assistants. The number of gifted children studied was 643, and there were ample controls. The report shows that

A wonderful two years' trip at full pay—

but only men with imagination can take it

ABOUT one man in ten will be appealed to by this page. The other nine will be hard workers, earnest, ambitious in their way, but to them a coupon is a coupon; a book is a book; a Course is a Course. The one man in ten has imagination.

And imagination rules the world.

Let us put it this way. An automobile is at your door; you are invited to pack your bag and step in. You will travel by limited train to New York. You will go directly to the office of the president of one of the biggest banks. You will spend hours with him, and with other bank presidents.

Each one will take you personally thru his institution. He will explain clearly the operations of his bank; he will answer any question that comes to your mind. In intimate personal conversation he will tell you what he has learned from his own experience. He will give you at first hand the things you need to know about the financial side of business. You will not leave these bankers until you have a thoro understanding of our great banking system.

When you have finished with them, the car will be waiting. It will take you to the offices of men who direct great selling organizations. They will be waiting for you; their time will be at your disposal—all the time you want until you know all you can learn about marketing, selling and advertising.

Again you will travel. You will visit the principal industries of the country. The men who have devoted their lives to production will be your guides thru these plants in Detroit, Cleveland, Chicago and in every great industrial center.

In Canada: C. P. R. Building, Toronto

Thru other days the heads of accounting departments will guide you. On others, men who have made their mark in office management; on others, traffic experts, and authorities in commercial law and credits. Great economists and teachers and business leaders will be your companions.

The whole journey will occupy two years. It will cost you nothing in income, for your salary will go right along. Every single day you will be in contact

you will be in contact with men whose authority is proved by incomes of \$50,000, \$100,000, or even more.

Do you think that any man with imagination could spend two years like that without being bigger at the end? Is it humanly possible for a mind to come in contact with the biggest minds in business without growing more self-reliant, more active, more able?

Is it worth a few pennies a day to have such an experience? Do you wonder that the men who have had it—who have made this two years' journey—are holding positions of executive responsibility in business everywhere?

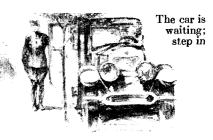

This wonderful two years' trip is what the Alexander Hamilton Institute offers you. Not merely a set of books (tho you do receive a business library which will be a source of guidance and inspiration thruout your business life). Not merely a set of lectures (tho the lectures parallel what is offered in the leading university schools of business). Not merely business problems which you solve, and from which you gain definite practical experience and self-confidence.

All these—books, lectures, problems, reports, bulletins—come to you, but they are not the real Course. The real Course is the experience of the most successful business men in the country. For two years you live with them. In two years you gain what they have had to work out for themselves thru a lifetime of practical effort.

Send for this famous book

If you are the one man in ten to whom this page is directed, there is a book which you will be glad to own. It is called "Forging Ahead in Business." It costs you nothing, yet it is permanently valuable.

This book is a wonderful stimulus to men of imagination. If you have read thus far, and if you are at least 21 years of age, you are one of the men who ought to clip the coupon and receive the book with our compliments.
