# Listerine likes nothing better than to FIGHT INFECTIOUS DANDRUFF

LISTERINE should be good news to you if you have any sign of this condition.

That's the kind of a case Listerine Antiseptic warmly welcomes... the infectious type in which germs are active... in which inflammation and itching may be present... in which scales and flakes are a humiliating problem and relief is far off. Then Listerine really goes to work, giving amazing results which test cases readily show.

## Kills Infectious Dandruff Germs

That Listerine gives hair and scalp a cooling refreshing antiseptic bath. The scalp tingles and glows. Distressing flakes and scales begin to disappear. Inflammation and itching are alleviated.

But most important of all, Listerine Antiseptic kills millions of the germs associated with infectious dandruff—including the strange "bottle-brush" called *Pityrosporum Ovale*.

This threatening parasite is recognized by leading dandruff specialists to be a causative agent of infectious dandruff. As you know, dandruff is the most common diseased scaly condition of the scalp and is often infectious.

## Improvement in 76% of Test Cases

Extensive research showed that when rabbits were inoculated with *Pityrosporum Ovale*, they developed dandruff symptoms like those which you are familiar. When Listerine was applied daily to the affected areas these symptoms disappeared in 14 days, on the average.

Similar tests on men and women who used Listerine Antiseptic and massage twice a day yielded even more impressive results. In one series of tests 76% of dandruff sufferers showed complete disappearance of or marked improvement in the symptoms of dandruff in 30 days.

Confirming such scientific results are numerous letters from users, praising Listerine Antiseptic for dandruff.

## Don't Delay... Use Listerine Now

If you have any sign of dandruff, start the Listerine treatment at once. Neglect may aggravate the symptoms.

Parke-Davis Pharmaceutical Co., St. Louis, Mo.

## THE TREATMENT

**MEN:** Douse full strength Listerine Antiseptic on the scalp morning and night. **WOMEN:** Part the hair at various places, and apply Listerine Antiseptic right along the part with a medicine dropper, to avoid wetting the hair excessively.

Always follow with vigorous and persistent massage with fingers or a good hair brush. Continue the treatment so long as dandruff is in evidence. And even though you're free from dandruff, enjoy a Listerine massage once a week to guard against infection. Listerine Antiseptic is the same antiseptic that has been famous for more than 50 years as a mouth wash and gargle.

## The medical treatment that thousands employ!
