Any woman who washes  
the dishes by hand is  
doing work that a little  
electric motor can do  
for 2½ cents an hour.

Washing dishes, shoveling coal, laundering clothes, sweeping and dusting—these are a few of the tasks that can be done in the completely electrified home for a few cents a day.

Your electrical company or dealer will be glad to show you electric appliances marked with the G-E monogram, and explain how they can do your work and increase the comfort of your home.
