What? Soft white hands from a *power house*!

YES, because those hands are snapping electric switches instead of being parboiled in greasy dishwater three times a day, scrubbed in laundry suds once a week, and calloused by the daily ordeal of dustpan and broom.

No need to throw your youth away on household tasks that electricity from the power house will do for a few cents a day.

Electricity's hands are tireless. Put them to work and save your own.

No home is truly modern without an electric dishwasher, washing machine, and vacuum cleaner, to mention only a few of the helpers in the *completely* electrified home. Your electrical company or dealer will show you a variety of appliances bearing the G-E monogram—your assurance that they are electrically correct and dependable.
