volume about a country with such a tempestuous recent history as Mexico's and seek to bring it up to date by altering a paragraph here and there, and adding a new chapter at the end, is an empty task. We feel that we are trying to see the Mexico of President Obregón over the shoulder of Dictator Diaz.

Now, after ten years of devastating strife, when Mexicans for the first time since 1915 are getting a chance to manage their own country and their own lives, we find that a book which was admirable sixteen years ago has quite the wrong slant in dealing with politics, education, law, and economics, however well the sections on early Mexico are handled. Here and there, too, important corrections have been overlooked. "A large union station at Vera Cruz" is promised "soon" by the author, whereas the enormous terminal at that port already wears quite a venerable look. Nobody any longer goes to Xochimilco by way of the Viga Canal. There is not the slightest account of the educational advance that has taken place under the present administration: no reference to the new land laws which have changed the social order of the country so profoundly. And the author

actually believes that the Rurales of Diaz a still keeping Mexico in order. They are dea (mostly) and gone.

A handsome book about Mexico of yeste day, whose author is capable of writing a entertaining work upon the vivid existin Mexico.

MARION STORM.

BOOKS ON ARCHITECTURE

Editor of THE FORUM:

In answer to inquiries about recent book on American architecture and the America point of view toward buildings, I beg to refe your readers to the following works, whic were useful to me in the preparation of m. article, "Do Our Buildings Interpret Us?" in the November number:

Æsthetic Basis of Greek Art, by Rhy Carpenter (Longmans Green, \$1.50); Beyon Architecture, by A. Kingsley Porter (Mashall Jones, Boston, \$2.25); Walled Town by Ralph Adams Cram (Marshall Jones) The Meaning of Architecture, by Irving K Pond (Marshall Jones, \$2.25).

H. VAN BUREN MAGONIGLE.
