

THE FREEMAN — Volume 17, January-December 1967

Prepared by BETTINA BIEN of the Foundation staff

NOTE: In page references, the number preceding the colon designates the month, the number following the colon refers to pages. All articles have at least three entries—author, subject, and title, except in a few cases when title entries seemed repetitive. Books reviewed are listed on page 768.

- ADENAUER, Konrad
In memoriam . . . (Chamberlin) 7:387-393
- AGRICULTURE
Can food supply keep pace with population growth? (Brandt) 1:18-23
- ALTERNATIVE to compulsion (Barger)
10:605-611
- AMBITION/incentive

3 copies	2.00
10 copies	6.00
100 copies	45.00

Also available in
standard clothbound volume, \$2.50

- The first edition of MAINSPRING (279 pp., indexed) was published in 1947. Since Mr. Weaver's passing, this great book has been the property of FEE. Previous to this new paperback edition, 350,000 copies have been printed.

One large company's circulating library for employees required 150 volumes to meet the demand.

Based on FEE's experience, MAINSPRING tops all books as a starter for any aspiring student of liberty. Easy reading — indeed, exciting — the beginner becomes so interested in freedom that he can hardly help pursuing the subject further.

FEE's recommendation: Keep a good supply of the paperbacks on hand to present to any individual who shows a spark of interest in freedom.

EXCHANGEABILITY

■ Purchasing power is not a "lump" or quantity of anything, but a relationship. Its essence consists in having something to exchange, under conditions that make exchange possible . . . One's purchasing power is the amount of *exchangeability* he can develop with reference to himself or anything he possesses. Perhaps we could say still more accurately that purchasing power is exchangeability—when we speak of the amount, we are raising the question of measurement. . . . **Maximum exchangeability** means **maximum purchasing power**; and disrupted exchangeability means **disrupted purchasing power**.
