cample of the last two I cite particularly Mr. lill's chapter on Japanese politics). Mr. Hill also somewhat inclined to think that "little llow fiends" are to blame for the war.

But if you still need a reminder that the xis is the Axis anywhere and that this war serious business in any part of the globe, xchange Ship is more urgently moving than ost "studies" of the Far East.

trange History

P TIDE OF AGGRESSION, by Lillian T. Mowrer. Mor-w. \$2.50.

THE author of Journalist's Wife has written what she intends as a primer tracing ne pattern of fascist aggression. She sincerely opes her book will help arouse what Mr. oosevelt called "the massed angered forces f common humanity." Her account, however, badly off balance and is thus cheated of its est punching power.

Mrs. Mowrer begins by telling us that fassm sprang out of the postwar confusion of the little man, unreasoning, rebellious, instinctively seeking the past. For her, fascism is a schnique thousands of years old—used by enin for revolution and by Hitler for counter-revolution! As a result of this astonishing onfusion, there is no true understanding of the development of fascist forces, or why they were appeased and encouraged in their agressions.

The author's misconception explains her ailure to understand that France was betayed by its own fascists. The French soliers, she says, were simply outfought and outhought by the Nazis. And finally her error eads her to exclude practically all mention of ne Soviet Union's fight to achieve a united ront against the aggressors. Except for the etail of Soviet material assistance to loyalist pain, there is nowhere in the book an indicaon of the Soviet's plea for genuine disarmaient, of its unfaltering attempt to rally the onscience of the democratic peoples for colective security, of its almost isolated fight in he League of Nations for China, for Ethipia, for Spain. There is no word of Russia's romise to defend with arms the life of "zechoslovakia, reiterated even in the moment efore Hitler marched. And in the earlier eriod of the war Mrs. Mowrer finds it posble to omit all mention of Russia's continued esistance to Nazi design: Russia's advance hat halted the Nazi blitz in Poland, its liquiation of the threat of Finland as a Nazi lace d'armes, its protection of the Baltic states, s encouragement of Balkan resistance to fasst demands—and finally, its position on the ast flank of Hitler, a position which the sehrer himself declared was making it imossible to invade England. Mrs. Mowrer's rplanation for the attack on Russia is a owler: the Nazis struck at one-sixth of the orld in order to create a pincer around Suez!

COUNTERATTACK

Dorothy Brewster reviews the new Broadway drama of Russian resistance. Plenty of action, shooting suspense—but some good talk too. A "melodrama" with subtleties and historical truth.

OUNTERATTACK" comes to fill the gap left by the closing of the Theater Guild production The Russian People. Thus we have the second major attempt to adapt to Broadway audiences a Soviet play dealing with the present conflict. Comparisons are in order, especially on those points that may promise greater success for the new play by Janet and Philip Stevenson (based on a Russian drama by Ilya Vershinin and Mikhail Ruderman). Seats are said in the newspapers to be on sale eight weeks in advance—an encouraging sign. "Melodrama" is the word the advertisements are playing up, suggesting action and not talk, and of course it is talk that American audiences always fear to face in a Russian production.

The Russian People had a good many scene shifts and plot complications. But Counterattack, as a gentleman behind me said, is just as simple as cops and robbers, with plenty of shooting. It has the concentration secured by adherence to the three unities of time, place, and action. It all happens within about thirty-six hours: a late afternoon and two following dawns, in the cellar of a house on the Eastern Front in the autumn of 1942. It might be Stalingrad. Most of the time, exit from the cellar is completely blocked by the wreckage of the building sitting on top of it, and complete collapse is threatened whenever tanks rumble overhead or bombing planes drop their load. These threats make it what PM called the dirtiest play on Broadway-literally-because the dust is always drifting down on the actors. Trapped in the cellar are a dozen Nazis, including a nurse who by some accident was caught in the front line, and two Red Army men who had captured the Nazis, just before the retreat into the cellar to escape the bombs.

THE action develops out of the struggles implicit in this situation. First, the struggle for survival of the whole group till rescue, either by Nazis or Russians. How can they survive lack of food and water (there is a little at first), and air, and can they perhaps dig their way out? Then there is the struggle between the Nazis and the Russians. The Red Army men—one a young collective farm lad and the other an older man, a miner—have the guns and revolvers and hand grenades, and the lights—a candle, a lantern, and a flashlight. And the Nazis are always alert to the possibility of putting out lights

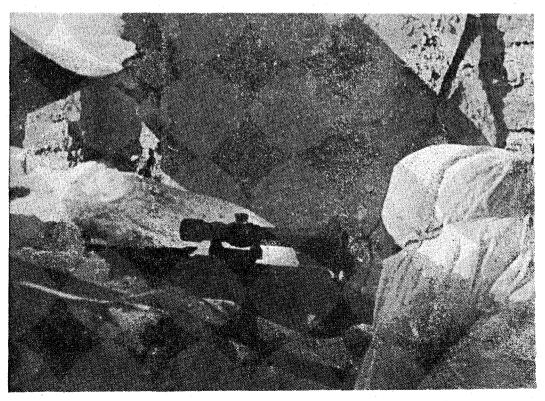

or seizing a gun. That is the physical aspect of the struggle. A struggle of wits grows out of the fact that all the Nazis but one (a sergeant) wear the uniforms of privates; but there is good reason to suspect that one of them is an officer, and it is of the utmost importance for the Russians to find out which one and turn him over, intact, to the commanding Soviet officer, if and when they are rescued. This gives an excellent reason for being careful of the lives of all the Nazis, even when it is almost humanly impossible to keep from shooting some of them in sheer disgust.

A THIRD element of conflict is within the Nazi group itself. One lad—a recent transfer not known to the others—shows that he could rather easily be won over; he is not only afraid, but he is unduly appreciative of the decent treatment, like sharing the water supply, which the Russian code toward prisoners of war exacts. So he is marked for elimination by the disguised officer, and on the first dawn, is found strangled. The nurse and the oldest of the Nazis, an ex-miner and old trade unionist, become in their different ways increasingly disposed to cooperate with

their captors. The nurse, poor girl, is alway having to resist the violent advances of th biggest roughneck among the Nazis; and sh isn't very happy about the strangling. Whe the younger Russian is knocked on the hea during one of the moments of brief Naz triumph when the lights are put out, th nurse consents to bandage him up, and th nearest approach to love interest gets unde way—but only a very little way, rather ma ternal.

A final element of conflict in the Naz group is revealed when it appears that one of them is a Gestapo man, set to wate the disguised officer. Open antagonism break out after the officer has been forced to de clare himself. So when you really examine the elements of struggle, it isn't after all just cops-and-robbers pattern.

The two Russians are simple types, chiefl individualized by difference in experience: th older much clearer in his thinking and muc more adroit in his handling of the situation There is more subtle shading in the characterization of the Nazis. And I can say thi with confidence because a German frience an exile, saw the play with me, and was impressed by this shading and the truth to th

A Red Army sniper sights the enemy. From "The Siege of Leningrad," reviewed on the opposite page.
