GRANULA:

The Best Food, : :
The Best Medicine.

GRANULA, Originated by the famous Dr. James C. Jackson over thirty years ago, is a scientifically prepared and twice-cooked food, containing all the nutritious properties of the unequalled Genesee Valley winter wheat in such form and proportion as to be quickly digested and thoroughly assimilated by the entire body.

It has been called "The Perfect Food." As such it is a remarkable remedy for certain diseases, and if regularly and persistently used will not fail to remove Dyspepsia, Indigestion, Constipation, and Chronic Diarrhoea.

It has proved a specific for Piles, Rheumatism, Kidney, Liver, Lung, and Skin Diseases, including Scrofula, Catarrh, and General Debility.

To relieve the troubles peculiar to women there is nothing equal to the use of Granula as a principal diet.

Granula should be eaten daily by children from about the nursing period on, as it builds up the tissues rapidly and clears the system of impurities.

Granula is manufactured solely by

CONSUMPTION

Thanksgiving at the Home for the Friendless

The American Female Guardian Society and Home for the Friendless will give its Thanksgiving dinner to the two hundred and ten children under its care at the Home, 29 East Twenty-ninth Street and 32 East Thirtieth Street, New York, on Thanksgiving Day, at 12:30 P.M. At 2 o'clock there will be exercises by the children in the chapel and addresses by the Rev. John Hall, D.D., and other speakers. Visitors will be cordially welcomed and conducted over the building, which will be open to them all day.

The Society is undenominational, and its work has been carried on from the first by women. During its fifty-nine years, forty thousand children have been sheltered in the Home, and many thousands placed in permanent homes. A judge of one of our courts said of the Society recently: "Its work is very quiet and unostentatious, but, in my opinion, there is not a better-managed institution in the city."

It has established twelve Industrial Schools in the tenement-house districts and among the children of foreigners, which enroll five thousand scholars. Cooking and sewing are taught, and kindergarten departments are being introduced. A lunch of bread is furnished daily in the schools.

The Society has no endowment, and depends largely on voluntary contributions for its support. Mrs. Henry C. Houghton is the President; Mrs. S. A. Stone, Treasurer.

"I passed your door last evening, Miss Gildersleeve," remarked young Mr. Gilley. "How kind of you!" replied the grateful girl.—*Harper's Bazar*.

For Dyspepsia

Use Horsford's Acid Phosphate

Dr. LORENZO WAITE, Pittsfield, Mass., says: "From its use for a period of about eight weeks, to the exclusion of all other remedies, I attribute the restoration to health of a patient who was emaciated to the last degree, in consequence of nervous prostration and dyspepsia. This patient's stomach was in such an irritable condition that he could not bear either liquid or solid food. An accomplished physician of many years' experience, whom I called in consultation, pronounced his case an incurable one. At this stage I decided to use Horsford's Acid Phosphate, which resulted as above mentioned."

King's Windsor Asbestos Cement FOR PLASTERING WALLS AND CEILINGS

If you are going to build a house, and desire to have it plastered with a material which will not require constant patching after it is completed, and at the same time insure perfect safety in the most expensive decorations, insist upon your architect specifying King's Windsor Asbestos Cement.

It is not only 300 per cent. stronger than any other plastering material, but elastic, composed as it is exclusively of gypsum and asbestos, the natures of which not only make it fire-proof, but place it beyond any injury which might possibly be done by water.

As a rule, clients limit the cost of their buildings, and thus the architect is obliged to cut down his estimate, with the result that invariably the plastering of some of our best buildings is of an extremely poor quality, but good enough to pass the superficial inspection.

Following soon after come the falling ceilings and endless patching, which in five years' time would amount to quite as much as the original cost of the entire work; thus demonstrating that the best quality of material on so important a part of a building as plastering, where very often the decorations cost three or four times the original amount of the plaster, is by far the cheapest in the end.

Some plasterers will tell you that this is a new thing, and that you had better confine yourself to the old method of lime and hair, which naturally would furnish him with the most lucrative part of his profession, *i. e.*, patching; but, inasmuch as we have sold nearly one million barrels of this material in the past three years, and it has given perfect satisfaction in every case where directions have been followed, we are compelled to dispute this statement of the plasterer.

At the same time we would refer you to the following buildings throughout the country which have been plastered with this material:

Park & Tilford's New Stores, New York City.
Postal Telegraph Building, New York City.
Mail and Express, New York City.
New York Times, New York City.
Holland House, New York City.
Dr. Meredith's Church, Brooklyn, N. Y.

State Capitol, Columbia, S. C.
Y. M. C. A. Building, Glens Falls, N. Y.
Albright Memorial Library, Scranton, Pa.
Moses Taylor Hospital, Scranton, Pa.
Elm Park M. E. Parsonage, Scranton, Pa.

Parties purchasing a house from the so-called "Speculative Builders" will find it greatly to their advantage to ascertain, if possible, the material that it is plastered with, and, if it is not done with King's Windsor Asbestos Cement, by all means insist upon the seller signing an agreement to keep the plastering in order for at least three years and pay all damages to your decoration that may occur by falling walls and ceilings.

The majority of the builders admit the superiority of King's Windsor Asbestos Cement, but in order to save the slight additional cost on a house they continue to use the old method of lime, hair, and sand, which consists of a very little of the former and a great deal of loamy sand, which very often contains decayed vegetation and enough of malodorous diseased cattle hair to hold this mixture of dried mud together until the house passes out of his hands and is paid for.

If you wish to avoid this class of dwellings in the future, which will prove to be a perpetual drain upon your finances, as well as a standing menace to your health, send to us for a circular of our material, with a list of Agents throughout the country.
