*Mary Brodie won't feel the lump in her breast
for another two years.*

Like a lot of women, Mary Brodie understands the importance of regular breast self-examination. And because she's never felt a lump, she thinks everything is fine. It's the same conclusion a lot of women reach.

Unfortunately, it's wrong.

The tiny tumor that's forming in her breast is too small to feel. But with mammography, it's not too small to see.

And tomorrow Mary is getting her first mammogram. Thanks, in part, to a new x-ray film created by DuPont that makes it safer for women to start

mammography early.

And for Mary, early detection means a two year head start on the rest of her life.

At DuPont, we make the things that make a difference.

Better things for better living
